About me

As a Visual Communication student, creativity meets functionality to craft engaging visuals. I am proficient in Adobe Creative Suite, with a strong grasp of design principles to create impactful designs. With experience in coursework and projects, I have refined the ability to blend storytelling with innovation and passionate about exploring the evolving design landscape and contributing fresh, compelling solutions. When I'm not immersed in designing, you'll find me traveling to explore new cultures, capturing life's moments through my camera lens, and spending quality time with animals.
